Daisho Denshi Pattern design and Simulation

■Pattern design

We have many designers and they are more than 10 years of experience!! We will design with that experience!!

Example...

Rigid flexible board

High multilayer BUP board

Package board

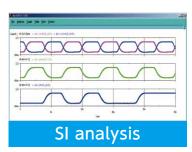

- Automotive
- camera
- Industrial equipment
- Communication equipment

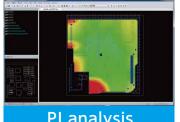

and so on...

We support PCB in various fields!

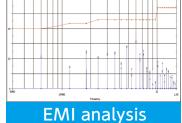

Simulation

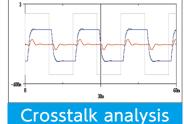

SI analysis, PI analysis, EMI analysis, crosstalk analysis, S-parameter analysis etc... How about with pattern design?
